WHY WELFAREWATCH?

Proactive welfare, built for trust.

Turn occupational signals and voluntary wellness inputs into actionable, supportive insights.

Predictive Insights

Identify changing stress and fatigue patterns before they become critical.

Voluntary Wellness

Personnel control their wellness check-ins and can review their own trends.

Privacy First

Role-based access and data minimization protect sensitive welfare information.

HOW IT WORKS

Predict → Explain → Support

01

Secure Inputs

Duty, workload and voluntary wellness indicators are collected securely.

02

AI Analysis

Models analyze patterns and changes over time to estimate risk.

03

Explainable Results

Key contributing factors are shown instead of a black-box score.

04

Welfare Action

Authorized personnel receive supportive recommendations for intervention.

Welfare first. Never punishment.

The prototype is designed as a decision-support system. AI predictions are not medical diagnoses and should not be used for disciplinary decisions.

WelfareWatch

Stronger Minds. Safer Missions.

Privacy-first prototype • AI decision support, not medical diagnosis
